

I SUPPORT NET NEUTRALITY and oppose today's action. The FCC should preserve the internet as an open conduit. In doing so, it will protect free expression, as well as commerce originating from businesses large and small. I urge the FCC to protect Americans from corporate greed. I am a small business owner and a public school teacher. I believe only the 1% will truly benefit from your actions to roll back the Net Neutrality regulations. The outcome of this action will show your true colors and who you are really protecting. Please listen to the public.
